

**AN EARLY GRADES PROGRAM
THAT ENSURES IMPROVEMENT
IN STUDENT LEARNING**

LEARNING

IGNITE! IS CUSTOMISED FOR YOUR SCHOOL'S NEEDS.

Many children in India are not learning. Only 30% of class 3 students can read class 2 text or solve simple subtraction. We have understood the root cause for this to be the lack of tools, training, support and motivation for teachers, and lack of parent engagement.

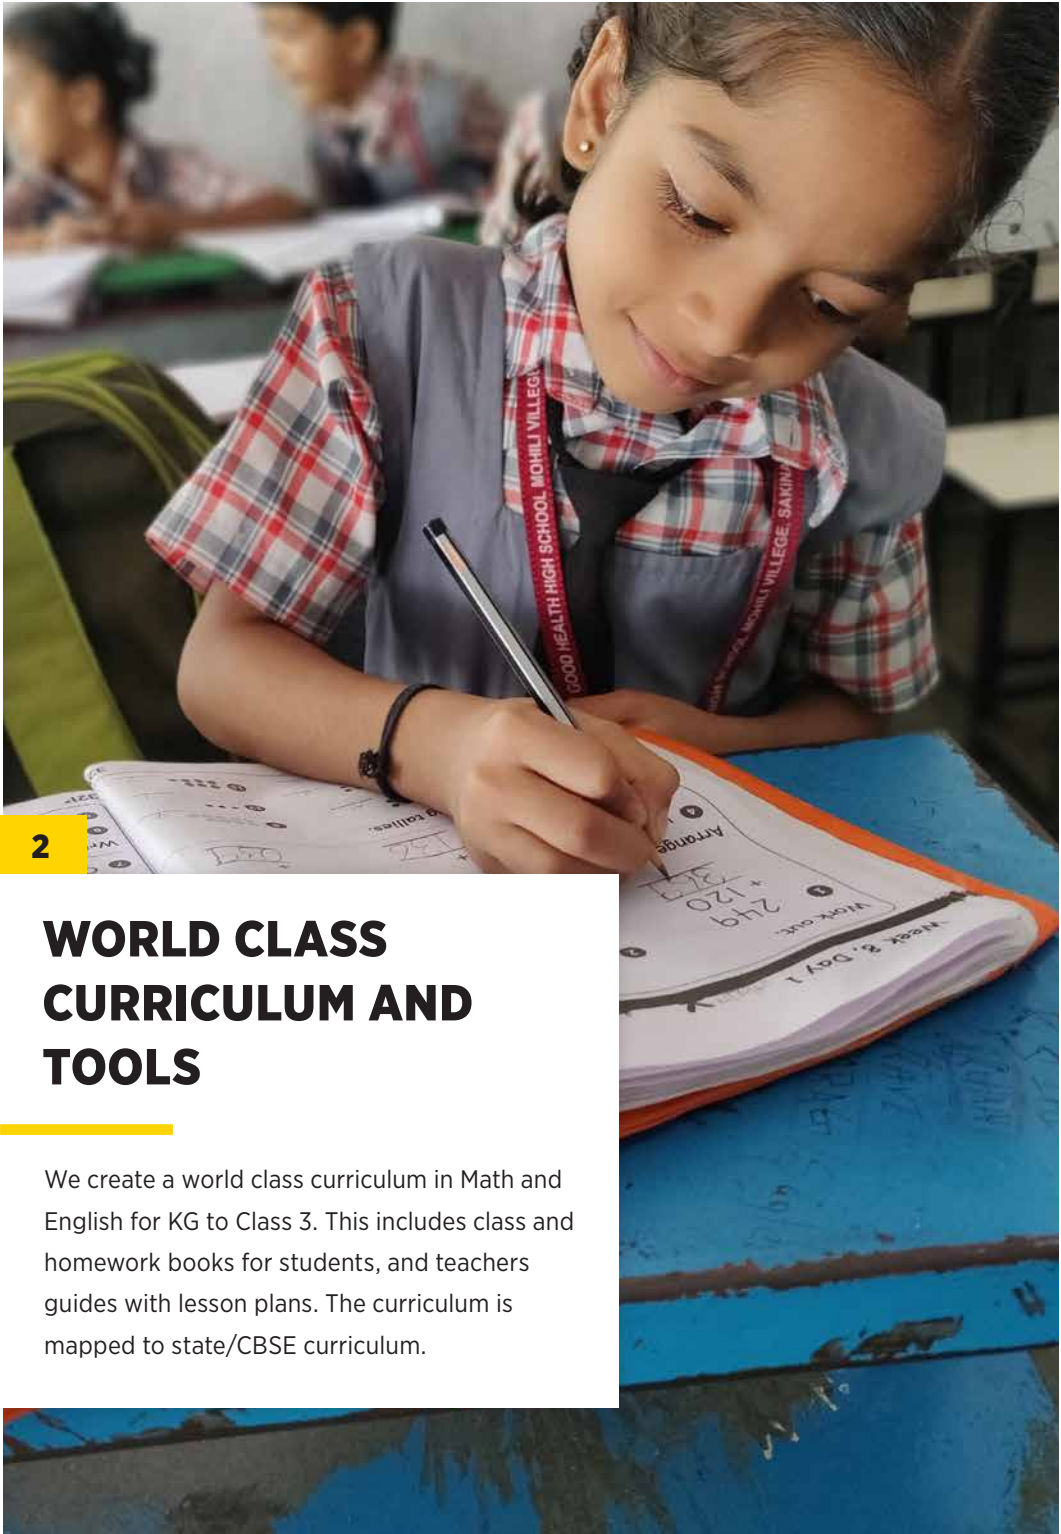

Ignite! is an integrated early grades program for KG to class 3 that ensures improvements in student learning. Our program addresses all aspects of school improvement, from training to tools and materials. We do this through:

- 1. Individualised training and support for every teacher**
- 2. World class curriculum and tools**
- 3. Student and teacher level data analysis**
- 4. Continuous communications with SLs and parents**

1

INDIVIDUALISED TRAINING AND SUPPORT FOR EVERY TEACHER

We train and support the teachers with content and general pedagogy to be prepared for the class once every 2 weeks. In these visits, we conduct classroom observations, conduct sample assessments, and provide immediate feedback to teachers.

2

WORLD CLASS CURRICULUM AND TOOLS

We create a world class curriculum in Math and English for KG to Class 3. This includes class and homework books for students, and teachers guides with lesson plans. The curriculum is mapped to state/CBSE curriculum.

“Till last year in our school, the children could only say sentences in the third grade, but now I can proudly say that the children in the 1 st grade are able to say these sentences. Now they can differentiate between colours, say numbers and read from the first grade itself.”

Reshma

Teacher, Mumbai

“Parent is one of the important factors in the education system.

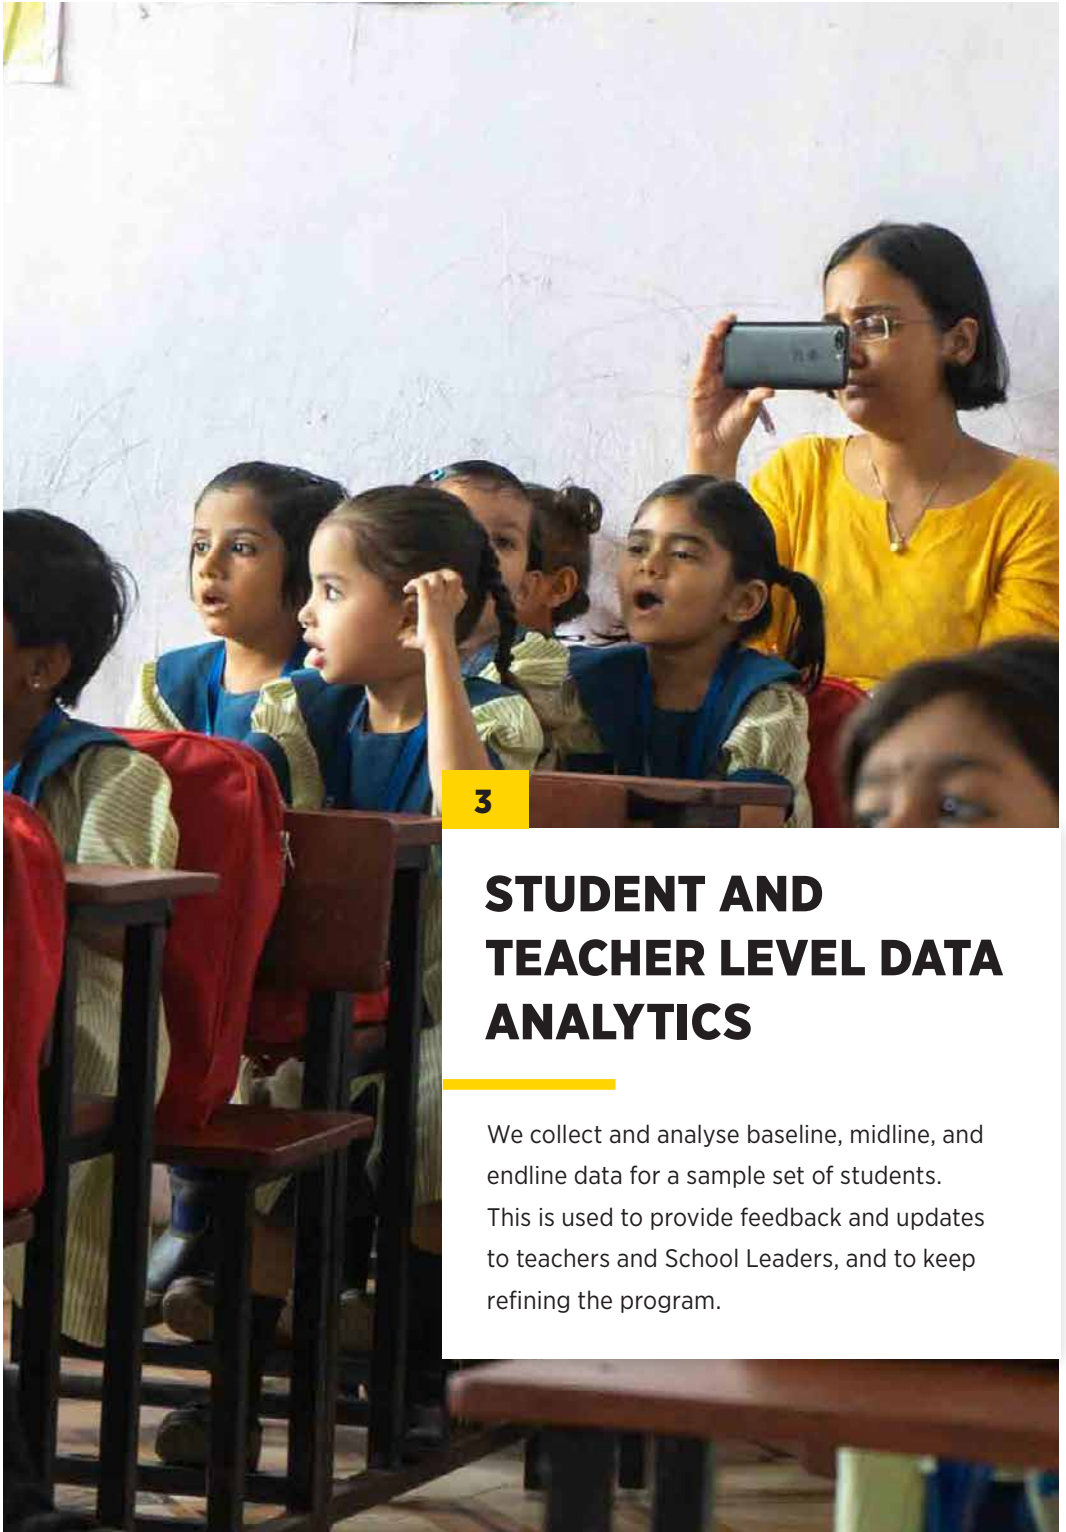

When parents are happy first of all you see the impact on attendance. Attendance of children is good. Satisfaction level of the parent has gone very high as after the program, there is no drop out happening.

Every school leader is interested in looking at the growth of the child and it is largely dependent on the teacher in the class. My kids are really doing well and they are growing. Ultimately as a school leader it not only gives me satisfaction but the mouth publicity of the school and branding of the school happens automatically. That is the advantage of having 321 with us.”

Farid Shaikh

School Leader, Mumbai

3

STUDENT AND TEACHER LEVEL DATA ANALYTICS

We collect and analyse baseline, midline, and endline data for a sample set of students.

This is used to provide feedback and updates to teachers and School Leaders, and to keep refining the program.

CONTINUOUS SUPPORT WITH SLs AND PARENTS

We support schools by conducting parent orientation workshops, organising Parent-Teacher meetings, and providing regular updates to parents and school leaders.

“After my child became a part of the program,
he started joining english letters and started reading by himself.
He also does counting, addition and subtraction by himself.
We do not have to help him. He does everything by himself.
Also, his marks have improved. I hope he keeps continuing
learning well.”

Shabnam Shaikh

Parent

PROGRAM OVERVIEW

Start of Year

- Books received
- Start of the year teacher training done
- Parent orientation & School Leaders orientation

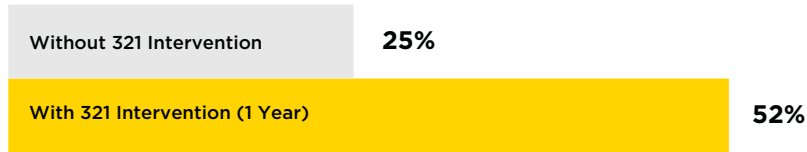

During the Year

- Teachers using Teacher guides every day
- Students using Student Classwork and Homework books everyday
- In class every 2 weeks - observations, sample student assessments, feedback conversations, next steps shared
- School leadership regularly updated
- Support to school leaders to conduct PTMs
- Support to teachers in conducting assessments for all students
- Conducting milestone sample assessments

End of Year

- Celebration event
- Support schools in organizing End of Year Showcase
- School performance report to leaders

**108% increase in number of Class 2 students
who can read a paragraph fluently**

**185% increase in number of Class 2 students
who can do 2-digit subtraction without borrowing**

*Evaluated by third party sources

THIS YEAR	LAST 5 YEARS
78 SCHOOLS	200 SCHOOLS
8,000 CHILDREN	1,20,000 CHILDREN
280 TEACHERS	3,500 TEACHERS

ACROSS MUMBAI, HYDERABAD, AND BENGALURU

ABOUT 321 EDUCATION FOUNDATION

We started in 2012 by opening a school for children from low-income communities in Mumbai. Our experience in running the school led us to understand the value that high quality teaching brings to a child's learning in school. The urgency for having more confident and empowered educators across schools led us to build customized programs for our teachers.
